A PRODUCT OF AMERICAN CHEMICAL TECHNOLOGIES, INC.

## EcoSafe® FR-46, FR-68 and FR-100

*Fire Resistant & Readily Biodegradable Hydraulic Fluids*

### DESCRIPTION:

**EcoSafe® FR** fluids are fully synthetic, non-aqueous hydraulic fluids that are Factory Mutual Approved industrial fluids. They can be used in industrial, marine, and mobile equipment, including high-pressure systems, systems with servo valves and all robotics. **EcoSafe® FR** fluids are formulated from a very high VI, fully synthetic basestock, coupled with a patented, non-metallic additive package which provide the properties demanded by today's high performance hydraulic systems, while at the same time, satisfying the stringent criteria for biodegradability and toxicity. All three viscosity grades achieved a 12-stage rating in the FZG Gear Test demonstrating a high level of protection against wear and scuffing. **EcoSafe® FR** fluids also have excellent low temperature properties; good shear stability, and are resistant to oxidative and thermal degradation. **EcoSafe® FR** fluids meet or surpass Bosch-Rexroth, Sauer-Danfoss, Denison, Parker and Eaton (formerly Vickers) specifications.

Typical physical properties are listed in Table 1. Seal compatibility data is listed in Tables 3 & 4. The increased performance which **EcoSafe® FR** fluids provide results in extended pump service life and reduced downtime along with lower maintenance costs. These fluids meet, or exceed, the pump performance of premium, anti-wear mineral oils, even at the 6,500 psi (450 bar) operating pressure. **Additional bonus features include:** non-sludge/varnish forming, high viscosity index, low pour point, excellent heat transfer, low foaming and complete compatibility with commonly used seals, hoses and metals.

If you want to add **EcoSafe® FR** fluid to a hydraulic system, call us and we will advise you regarding compatibility/solubility. Most "oil soluble" additives are not soluble in **EcoSafe® FR** fluids requiring a thorough and detailed plan prior to conversion. A separate information sheet 'Converting Hydraulic Systems to *EcoSafe® FR Fluids*' is available upon request. Your ACT representative is also trained and experienced in all aspects of conversion assistance.

**TABLE 1**  
**TYPICAL PHYSICAL PROPERTIES**

<u>Test</u>	<u>FR-46</u>	<u>FR-68</u>	<u>FR-100</u>
Viscosity @ 100 °F, SUS	250	350	480
@ 210 °F, SUS	57.5	69.8	86.6
Viscosity Index	178	185	192
Pour Point, °F	- 55	- 50	- 40
Density (lbs./gal) @ 60 °C	8.19	8.21	8.25
Flash Point, °F, COC	525	535	550

**TABLE 2**  
**TYPICAL PERFORMANCE PROPERTIES**

Vickers 104C Vane Pump (ASTM D-2882) (2,000 psi, 100 hours, 150 °F, 7.5 gpm, 1,200 rpm, 3.5 gal. Sample)	< 10 mg Total Wear *
Four Ball Wear (ASTM D-2266) (1,800 rpm, 1 hour, 167 °F, 40 kg load)	0.35 mm
Four Square Gear Test (FZG) (194 °F, 1,760 rpm, 1,600 ml sample, 12 stages)	Pass, all 12 stages
Turbine Oil Stability Test (ASTM D 943) (95 °C, iron and copper catalysts, 60 mls water) Time to 2.0 Acid Number increase	>2,000 hours

\* Results of 1.2 and 1.7 mg's Total Wear were obtained by UEC (USX Engineers & Consultants, Inc.)

**TABLE 4**  
**SEAL COMPATIBILITY WITH EcoSafe® FLUIDS (Continued)**  
**Test Method - DIN 53 521**

Material	NBR-1 (Buna-n)	FKM-2 (Viton)	Polyurethane P 5000
Temperature, °C	100	100	60
Time, hours	1,000	1,000	1,000
Hardness Change, Pts.	-5	-3	-2
Modulus Change, %	+29.5	+4.7	-8.6
Tensile Change, %	-11.9	-5.8	+13.2
Elongation Change, %	-31.5	+6.8	+15.7
Weight Change, %	+9.0	+0.7	+3.9
Volume Change, %	+10.8	+1.5	+4.7

Performed by: *Parker Hannifin GmbH*  
*Prädifa – Packing Division*

**TABLE 5**  
**ENVIRONMENTAL DATA**

OECD Ready Biodegradability Test Method 301B, 28 days	70.9
OECD Ready Biodegradability Test Method 301F, 28 days	88.0
OECD Method 203, Fish Acute Toxicity Test 96 hour LC50 for rainbow trout, <i>Oncorhynchus mykiss</i>	“practically non-toxic”
<i>Note: 60% biodegradation within 28 days is required to be classified as a “readily biodegradable” hydraulic fluid.</i>	

**STORAGE AND HANDLING:**

We believe **EcoSafe® FR** fluids have a low degree of hazard when used as intended. They are stable, non-corrosive; high flash point materials that are compatible with nearly all commonly used materials in standard hydraulic systems. As with all products of this type, we recommend that good hygiene practices be observed, including: (1) avoid prolonged skin contact, (2) provide adequate ventilation, (3) do not ingest; and that all OSHA Standards pertaining to products of this type be observed. Refer to American Chemical Technologies’ Material Safety Data Sheet for personnel protection, spill and leak procedures, handling and first aid information.

The information contained herein is correct to the best of our knowledge. The recommendations or suggestions contained in this bulletin are made without guarantee or representation as to results. We suggest that you evaluate these recommendations and suggestions in your own laboratory prior to use. Our responsibility for claims arising from breach of warranty, negligence, or otherwise is limited to the purchase price of the material. Freedom to use any patent owned by American Chemical Technologies’ or others is not to be inferred from any statement contained herein.
