

# FUNCTIONALITIES OF jaltest

TELEMATICS

## MULTI-SYSTEM COVERAGE

Enables unified management of mixed fleets across different manufacturers and onboard systems.

## AI/ALGORITHMS

Processes real-time data to optimize routes, reduce fuel consumption and trigger not only preventive alerts but predictive ones too.

## OPERATIONAL PERFORMANCE IMPROVEMENT

Tracks KPIs such as fuel efficiency, carbon footprint, braking evolution and overall fleet productivity.

## ADVANCED REMOTE DIAGNOSTICS

Detects faults and assesses component health without requiring on-site inspections.

## PREDICTIVE MAINTENANCE

Optimized planning for service interventions based on usage trends, component wear patterns and measurements' analysis.

## REMOTE ACTIONS

Set up alarm configurations, perform DPF regens and clear fault codes directly from our web platform.
